

Inclined & Upright Manometers

Our wide range of Inclined & Upright Manometers are easy to install and maintain. They come as a complete kit and are suitable for all air filter applications.

For the sensitive and accurate measurement of low pressure, vacuum and differential pressure.

THE KEY BENEFITS

1 — Accurate

All our manometers have precision machined reservoirs and indicating columns to ensure accurate measurements and readings. The built-in spirit level is factory preset so that when in use the Manometer can be quickly and accurately set to the correct angle of inclination.

2 — Economic

An essential piece of your air conditioning tool kit with no moving parts to repair or replace, our Inclined & Upright Manometers are extremely cost effective to buy. Making it easy to see when your filters need cleaning or replacing, they save on downtime too.

3 — Durable

Manufactured from solid acrylic block, our Inclined & Upright Manometers are strong, dependable and will stand the test of time.

RANGE

- Rear or angled connectors available
- Standard nozzle for 6mm bore flexi tubing, other connectors available.
- Static pressure ratings:
 - Standard 7 bar (Oil Filled S.G. 0.8 Red)
 - High 35 bar (Liquid Filled S.G. 1.0 Blue)
 - Very High 70 bar (Liquid Filled S.G. 1.88 Blue)
- Thickness:
 - Standard 25mm
 - High 50mm
